Evergreens

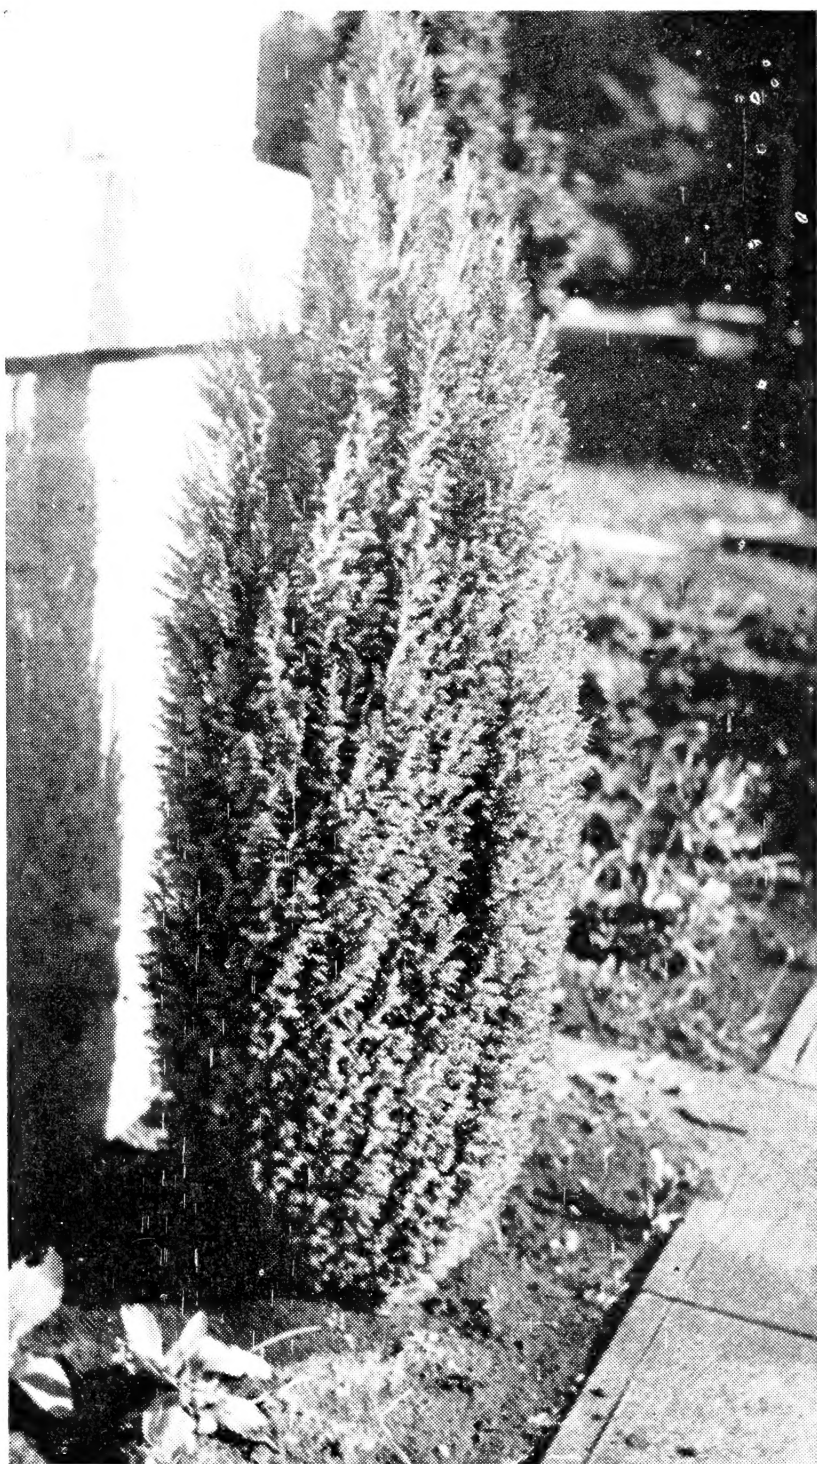

Conifers, Rooted Cuttings and Transplants

The following list of rooted cuttings will be for fall to spring shipment except varieties with an asterisk (*) are for Spring delivery, May-June. All transplants are grown in full sun. The sandy loam soil in which they are grown assures good root systems.

Broad-leaved Evergreens

ROOTED CUTTINGS

The varieties listed here are for spring shipment, April and May for outside planting, or if you want to transplant inside first, delivery can be made earlier. The transplants are rooted cuttings planted out in beds in full sun in the early summer. Azaleas and Heathers especially benefit with a good quantity of peat moss added to the soil.

Per 100

ABELIA EDWARD GOUCHER. A new variety, deep pink.

ABELIA GRANDIFLORA SHERWOODI (Dwarf Abelia).

ANDROMEDA. See Pieris japonica.

6.00

Azaleas

The rooted cuttings are available from fall to spring delivery, with a few exceptions. Most of them are extra heavy rooted cuttings which have been in the sand one year or more. The transplants are almost two-year stock. Dwarf varieties such as Gumpo, etc., are about 3-6" spread, while faster growers, such as Benegire, Sherwoodi, etc., are about 9-12" tall. Transplants are shipped with small amount of soil clinging to roots.

All varieties which are priced \$6.00 per 100 for R. C. can be supplied at \$50 per 1000. 250 of a variety at the 1000 rate, or 100 of a variety at the 1000 rate if you

order not less than 3 varieties (300 plants). This also applies at the 1000 rate on Tr. which are priced at \$140.00 per 1000 for those marked \$16.00 per 100.

It is best to give Azalea rooted cuttings protection from wind and sun the first winter to prevent the bark from cracking. This can be done by building frames 1 foot high around the beds and shade with lath or other material. Also it is well to hold up on fertilizers after July and not to water much after Sept. 1. This acts to harden off the wood, making them much hardier against severe cold weather.

	Per 100
ALICE. Kaempferi hybrid. Tall grower with large orange-red flowers.

BOXUS SEMP. ARBORESCENS (Truetree box). R. C.	6.00
BOXUS SEMP. SUFFRUITICOSA (Truedwarf box). R. C.	6.00
(Both of the above box are available, at \$50.00 per 1000 for rooted cuttings.)	
CHOISYA TERNATA (Mexican Orange).	
CISTUS CARBARIENSIS (White Rockrose). Low growing plant with good foliage and an abundance of white flowers in the summer. R. C.....	10.00
CISTUS PURPURENS (Orchid Rockrose). Said to be the best of Rock roses. Flowers 3 inches or more across are rich, rosy-pink with yellow stamens in center. The maroon blotch at their base adds to the attractively crinkled petals. Blooms much of the summer, starting in May or June. Unlike most of the broadleaved flowering evergreens such as camellias, etc., it likes full sun. A salable blooming-size plant can be produced in two years from a rooted cutting. The plant grows about 4 feet high and with a spread of 6 feet. Delivery, February to May. Rooted cuttings do not require shade the first year.	
COTONEASTER MICROPHYLLA (Rockspray Cotoneaster). Very popular spreading evergreen variety. Bears red berries in profusion.	
COTONEASTER MICROPHYLLA MINOR (Dwarf Rockspray Cotoneaster). Low-growing, with dainty, glossy, deep-green leaves, red berries. Disease free, hardy and evergreen. Makes a very good ground cover. R. C.....	7.00

- COTONEASTER MICROPHYLLA THYMIFOLIA
(Thyme Rockspray Cotoneaster). Desirable for
rock work and other plantings where small
shrubs are wanted because of its low, thick-
growing habit. The foliage is thyme-like, small
and dainty. This little dwarf bears red berries
and is evergreen. R. C..... 7.00
- COTONEASTER PARNEYI. Considered the best
upright cotoneaster. Bears red berries in won-
derful profusion.
- EUONYMUS JAP. MEDIO-PICTUS. R. C..... 6.00
- FIRETHORN. See Pyracantha.

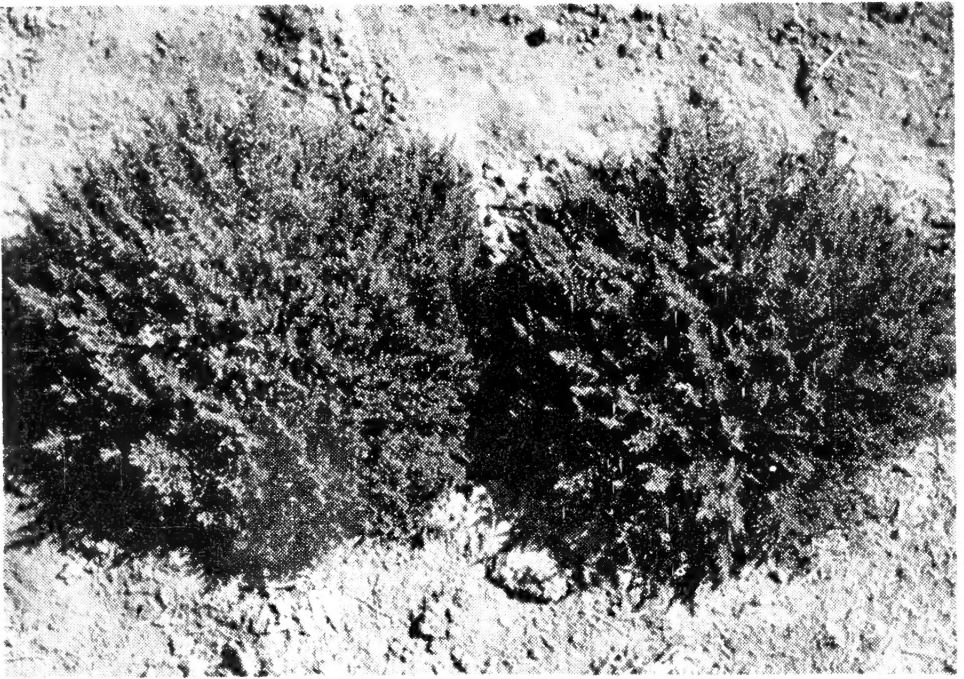

Calluna Vulgaris County Wicklow

Heathers

Heathers should be pruned after flowering to keep them compact. Those marked "Tr." were planted in open field beds early this summer and the Lge. Tr. were put out a year earlier. Rooted cuttings priced at \$5.00 per 100 are \$45.00 per 1000. Transplants which are priced at \$10.00 per 100 are \$90.00 per 1000. Large transplants priced at \$14.00 per 100 are \$120.00 per 1000. 250 or more at 1000 rate or 100 at 1000 rate if you order not less than 3 varieties (300 plants).
